

CW Skimmer: Quo Vadis contesting?

**From the Users
Perspective**

Michael Höding, DL6MHW

Agenda

- What is CW Skimmer?
 - Steps to CW Skimming
 - Demo
 - Operation, results, first conclusion
- Politics, philosophy, science fiction
 - Technology management
 - What is contesting?
 - Rules
- SDR technical background → DH1TW

Motivation of this Talk

- Hot discussion, e.g. cq-contest
 - Flood of Email
- iPetition „Ban CW Skimmer“ signed by 500+ testers, many well known calls
- Sometimes negative attitude
 - ... *The end of contesting*
- Often not well founded... just ideas and feelings
- Therefore „A more scientific approach“
 - background information, facts, data, different view points, less emotions

What is CW Skimmer?

- Software program by Alex Shovkoplyas, VE3NEA
- Wideband SDR software
- Built-in CW decoder
- some intelligence in callsign detection
- Simple telnet interface similar to DX cluster

*Developer of DX Atlas,
Morse Runner, Rocky...*

Situation, Steps to CW Skimmer

- Revolution or evolution? (see Karl Marx, Law of Transformation → quantity into quality)
- CW Decoder
- Band scopes
 - Built-in some TRX
 - External
 - SDR-based, like Rocky (by VE3NEA)
- Contest loggers helping to find a matching callsign (super check partial)

Step 1: Bandscope (Rocky)

- Useful to see the occupation of an band

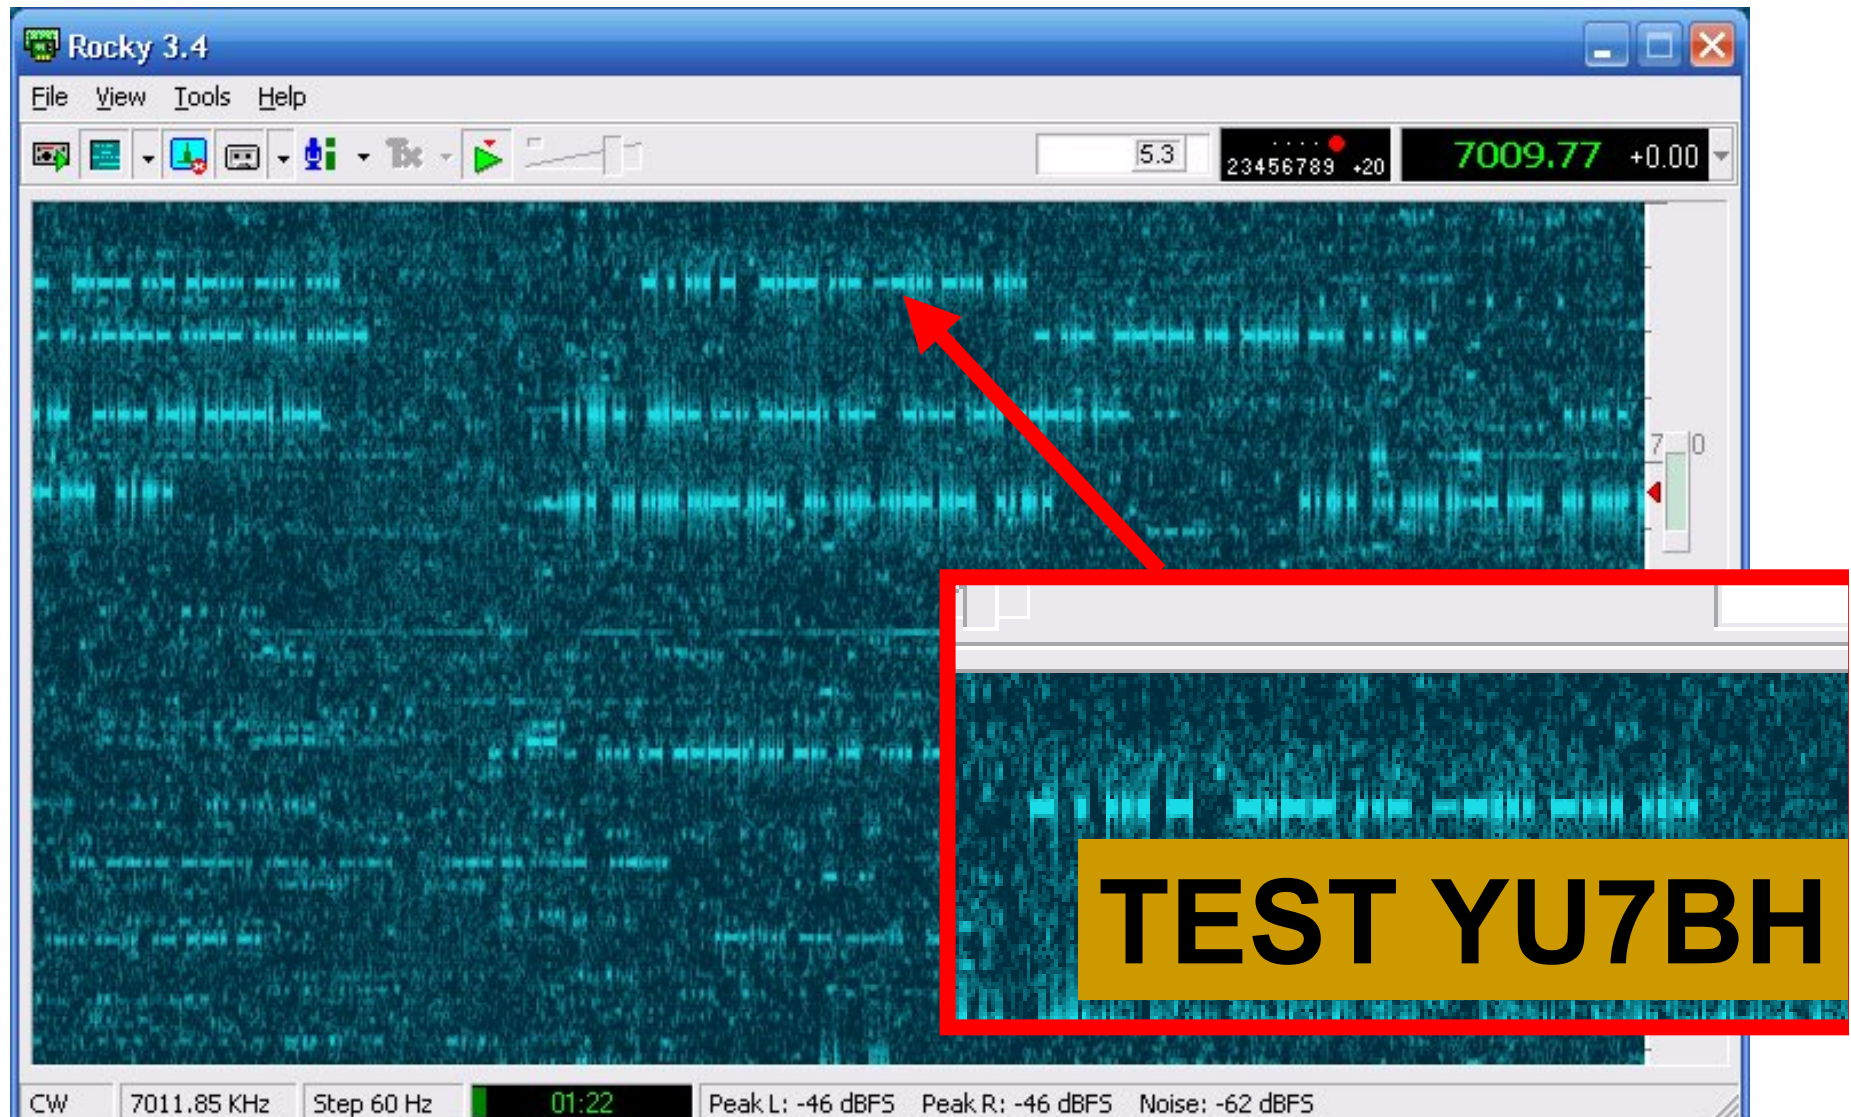

- ☐ Is there an opening on 10 m ?
- ☐ Is activity on 80 m starting ?

→ Life Demos with 15 minutes in wpx-cw-08-40m

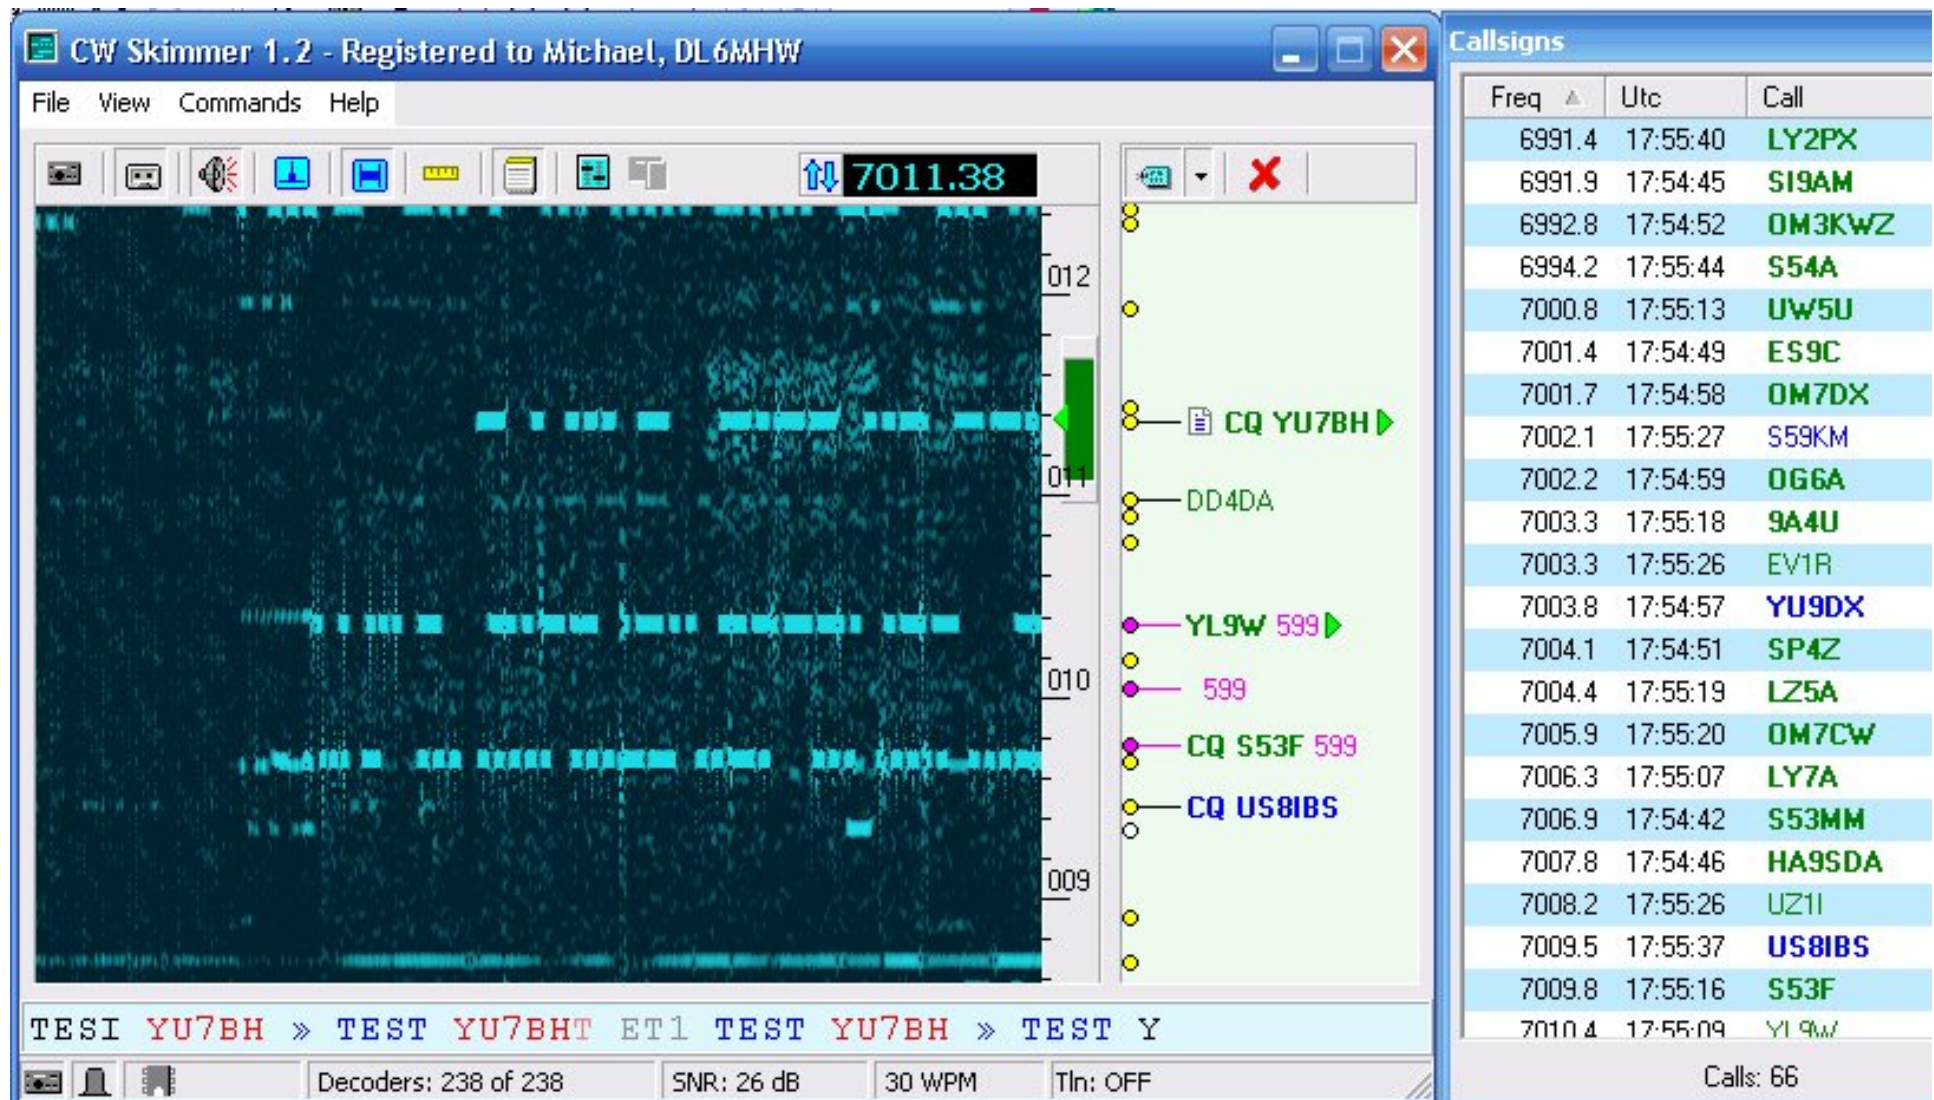

Step 2: Bandscope with Waterfall

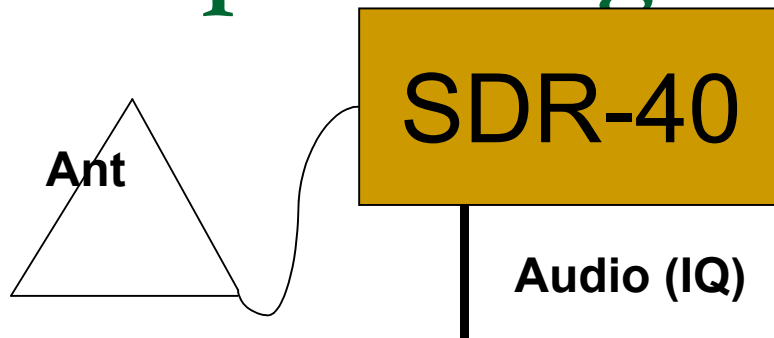

→ now read the code with your eyes!

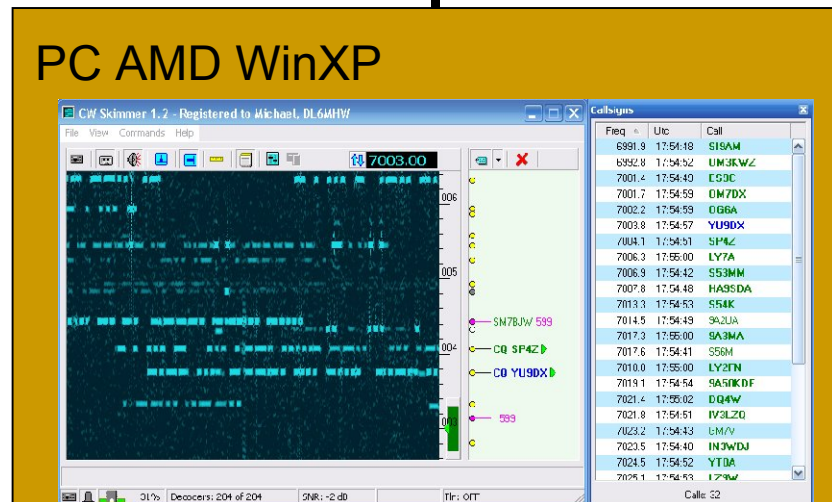

Step 3: CW Skimmer

Step 4: Integration

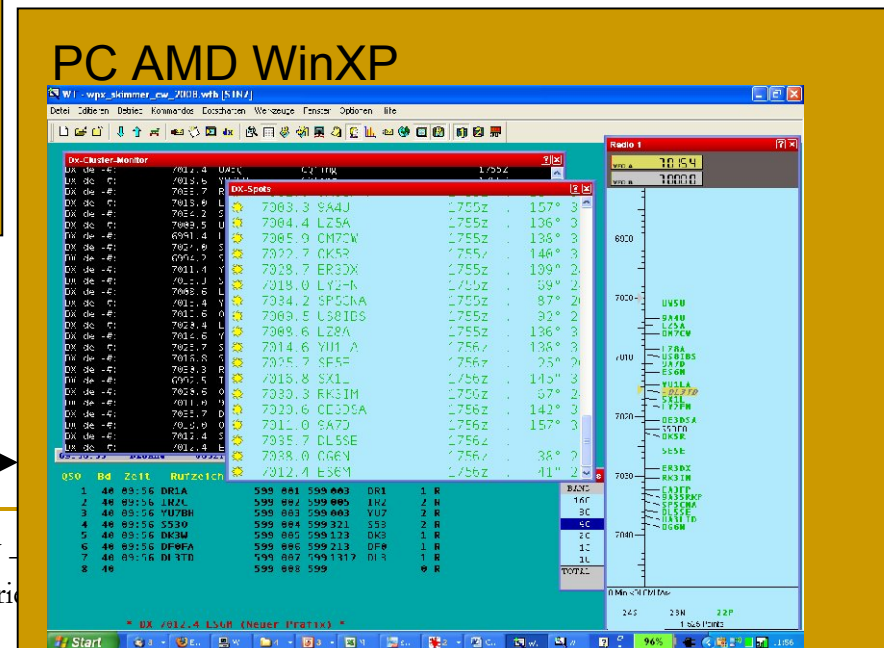

- Feed spots (CQs) from CW Skimmer into your Contest Logger → Bandmap

Telnet

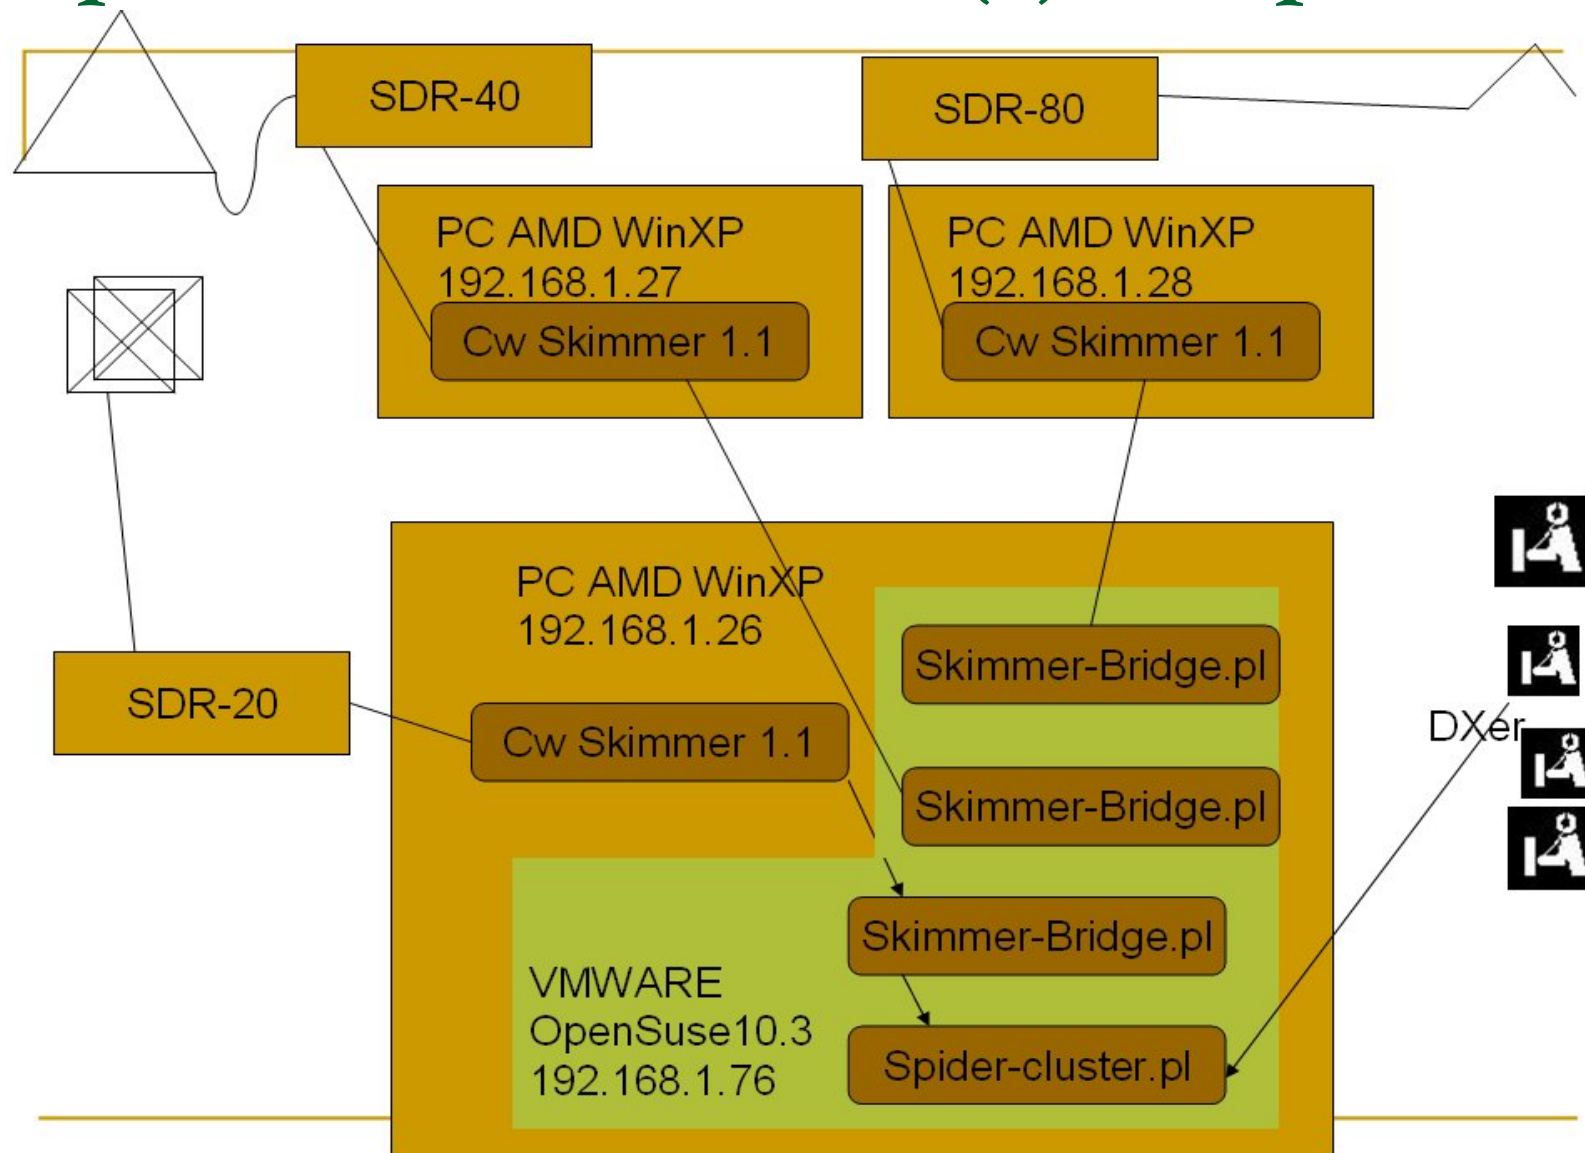

DL6MHW -
Ham Radio Fri

Experiments and data

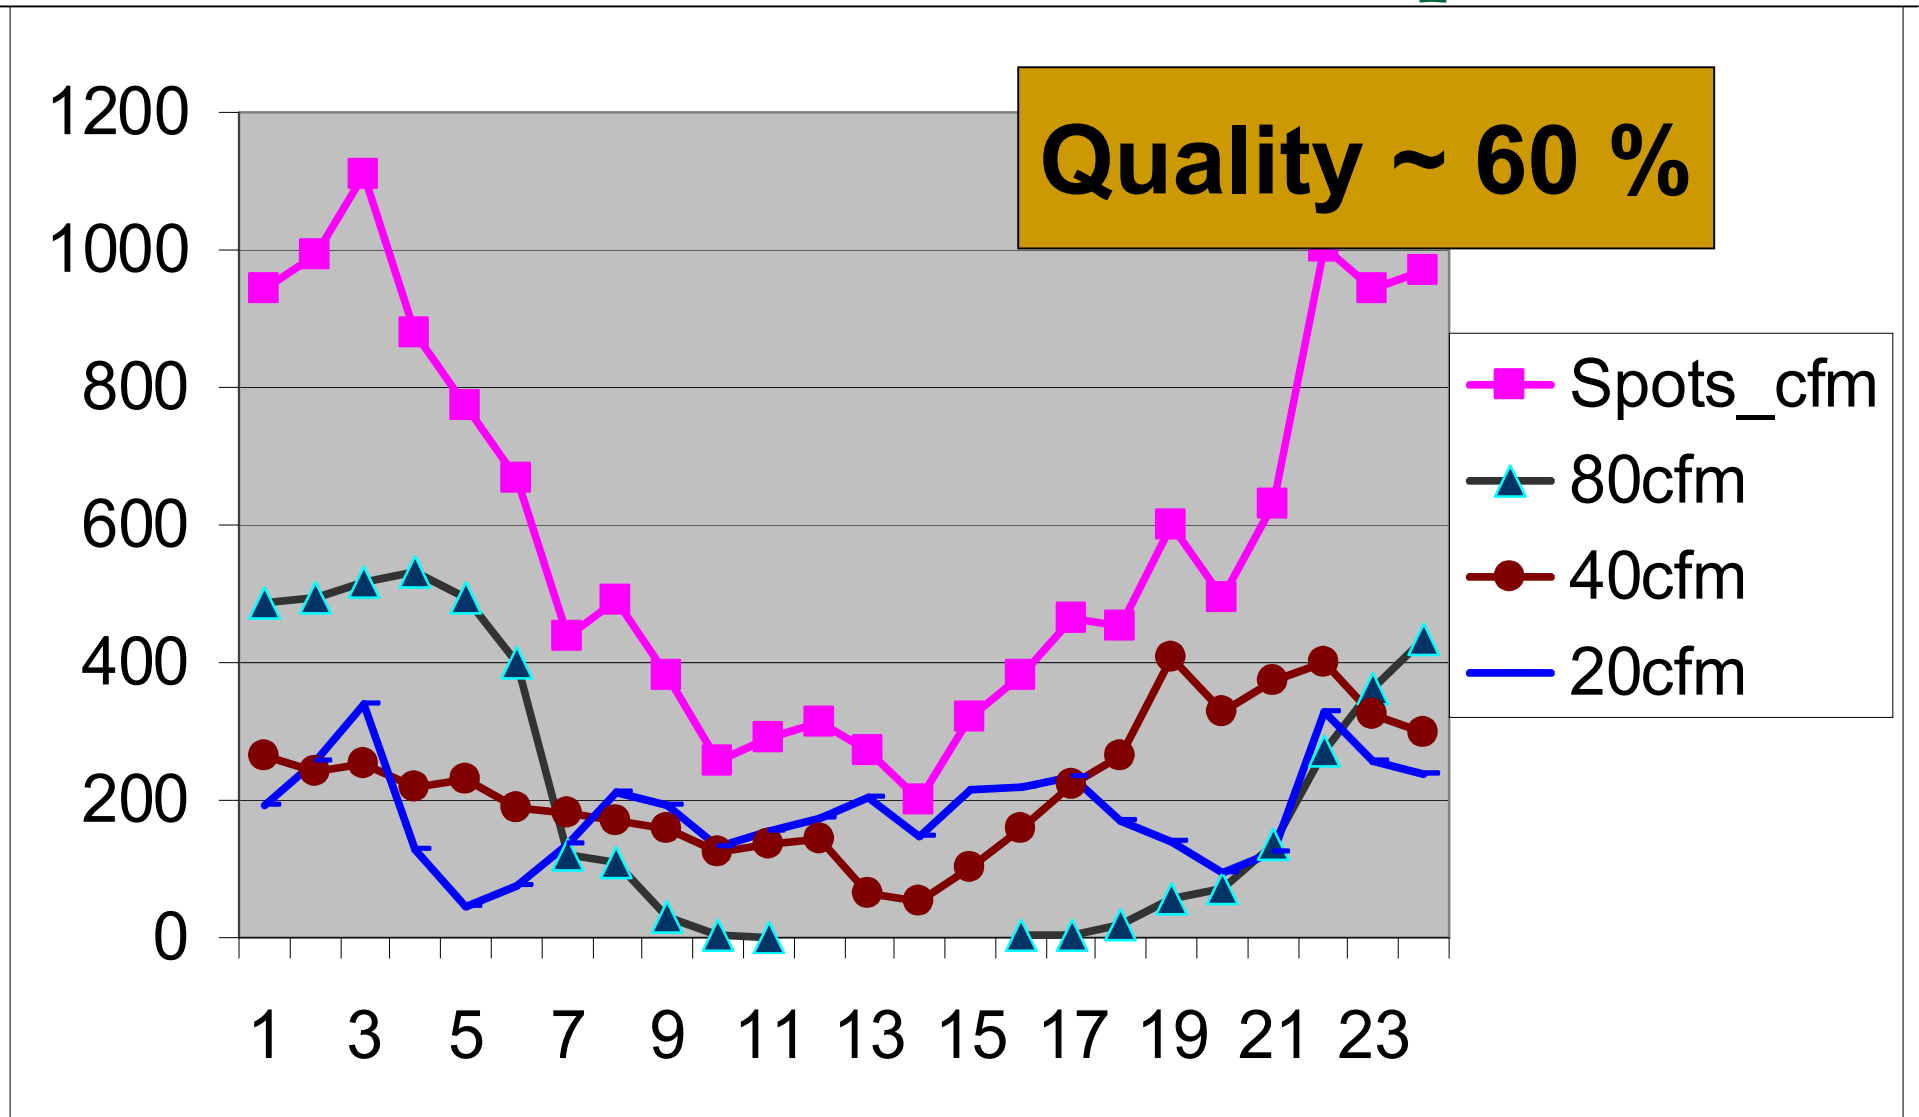

- Contests:
 - RRDXC, BCC-Party, WPX-CW, Fieldday
- SDR-RX: FUNKAMATEUR (160,80,20), Softrock (40)
- WPX: ~ 50000 skimmer spots
- WPX: full time CW Skimmer with public access → DR1A, DJ1OJ, DH0GHU, DL8MBS
- Detailed analysis in BCC-Circular

Experiments and Data (2) setup

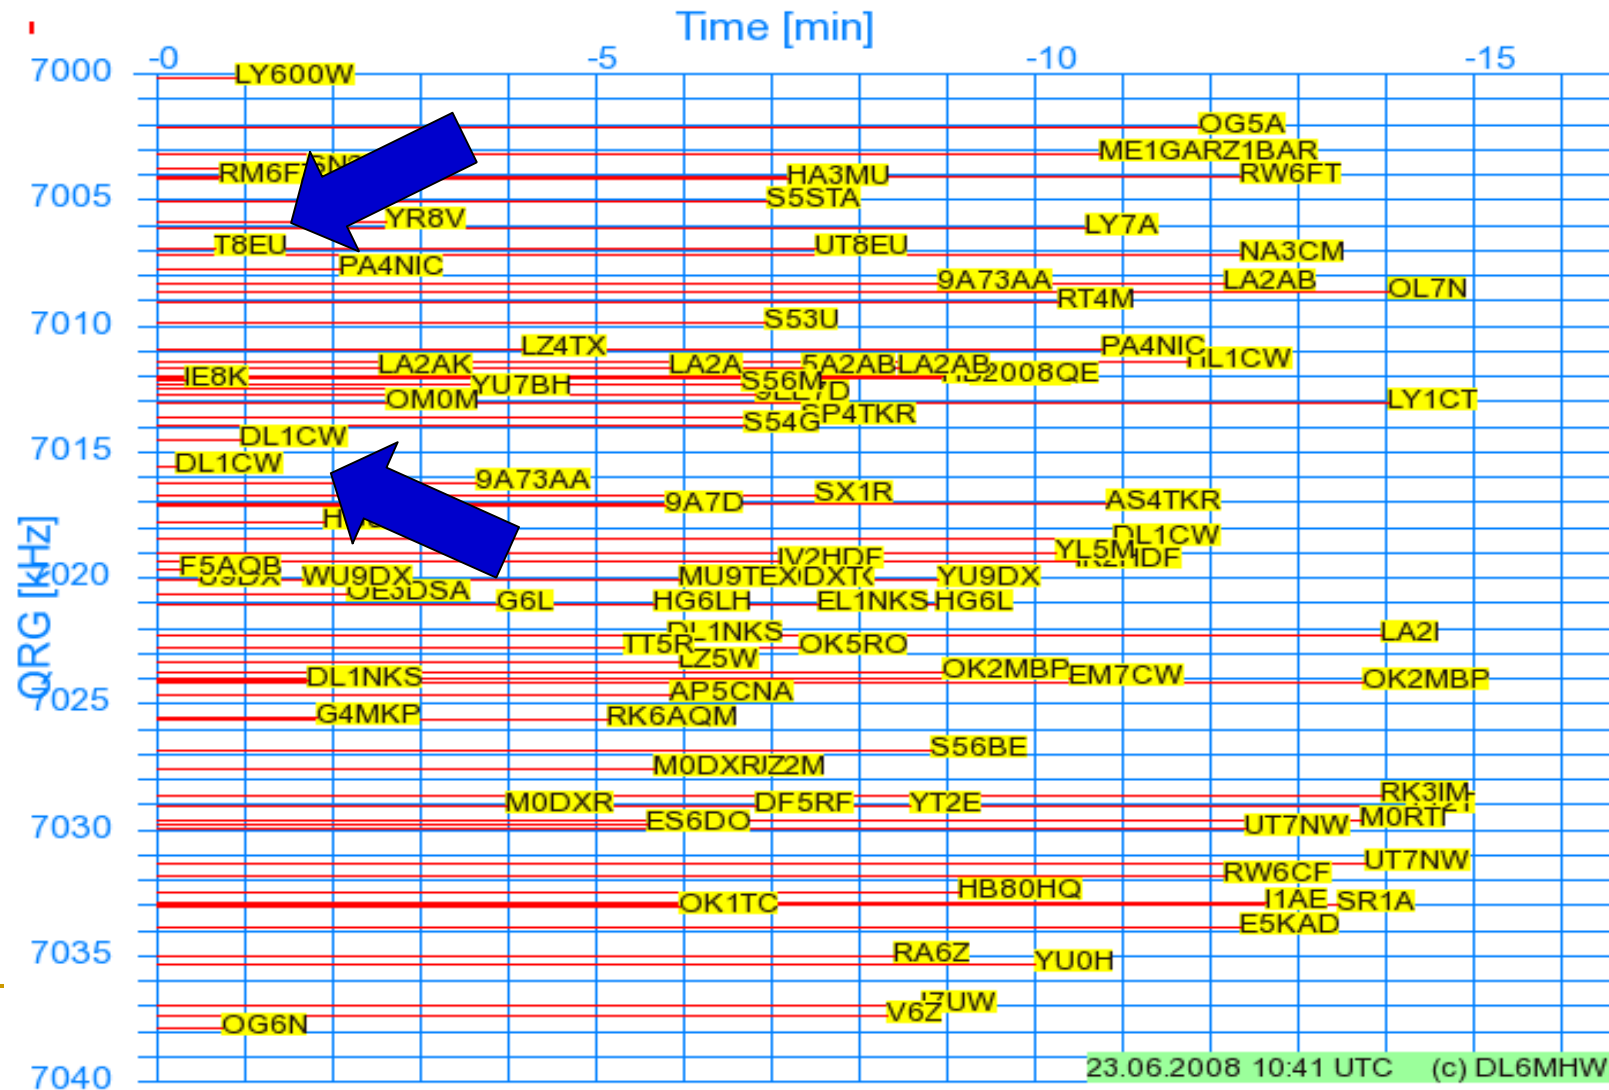

Experiments and data (3)

WPX 08: confirmed skimmer spots

Experiments and data (4)

managing flood of skimmer spots

Experiments and data (5)

callsign validation 1.1 → 1.2

Skimmer11	Minimal	Normal	Aggressive	Paranoid
5Z9W (1)	3U9DX (1)			
9A35RKP (1)	5Z9W (1)			
9A3MA (5)	9A35RKP (1)	9A35RKP (1)	9A35RKP (1)	9A35RKP (1)
9A4U (3)	9A3MA (8)			
9A50KDE (1)	9A4U (4)			
9A5D (3)	9A50KDE (5)			
9A5DE (1)	9A5D (3)			
9A60A (2)	9A5DE (1)			
9A6OMA (1)	9A60A (18)			
9A7D (1) ←	9A6TJA (1)			
	9A7D (1)			
9EA4U (1)	9A7N (1)			
9S7D (1) ←				

•241 Skimmer 1.1

•251 Minimal

•172 Calls normal

•166 Aggressive

•115 Paranoid

Start with CW Skimmer

- CW Skimmer (30 days free, then 70 \$)
- RX, e.g. FUNKAMATEUR-SDR
 - →DH1TW
- Computer
 - With stereo line-in
 - Fast processor (Dual Core is useful)
- SO2R: 2nd Radio IF with CW Skimmer
- You need some time for experiments

Operation and Score

- S&P or CQ on main band
- Skimmer on 2nd radio or skimmers on the next bands find spots or fill the bandmap
- Flip bands, work skimmer spots
- Easy mults (no DX → not spotted → missed)
 - Useful in WPX
- Strong improvement of score for lazy part time OP
- Small improvement for skilled full time SO2R OP
→ but often 3 % make the difference

First conclusions & experiences

- ***CW Skimmer is useful***
- First steps are really simple
- You need time to learn
- It is developing
 - More quality spots - less skimmer spam
- Similar assisted but more spots
- Local spots!

Agenda

- About CW Skimmer (with Demo)
 - ❑ Steps to CW Skimming
 - ❑ Operation, results and conclusion
 - ❑ Set up
- Politics, philosophy, science fiction
 - ❑ Technology management
 - ❑ What is contesting?
 - ❑ Rules

20 minutes?

Technology in Contesting

- Useful technology will be used
- Technology is **not evil** by itself
- Technological progress is irreversible
 - If VE3NEA stops skimmer development others will do next steps (open source SDR, Linux)
- Contesting is a technological sport
 - Maximum application of technology
→ Remember: „Formula 1 Approach“

Technology in contesting (looking back)

CW is an Art ... CW4EVER
This is just Button Pressing

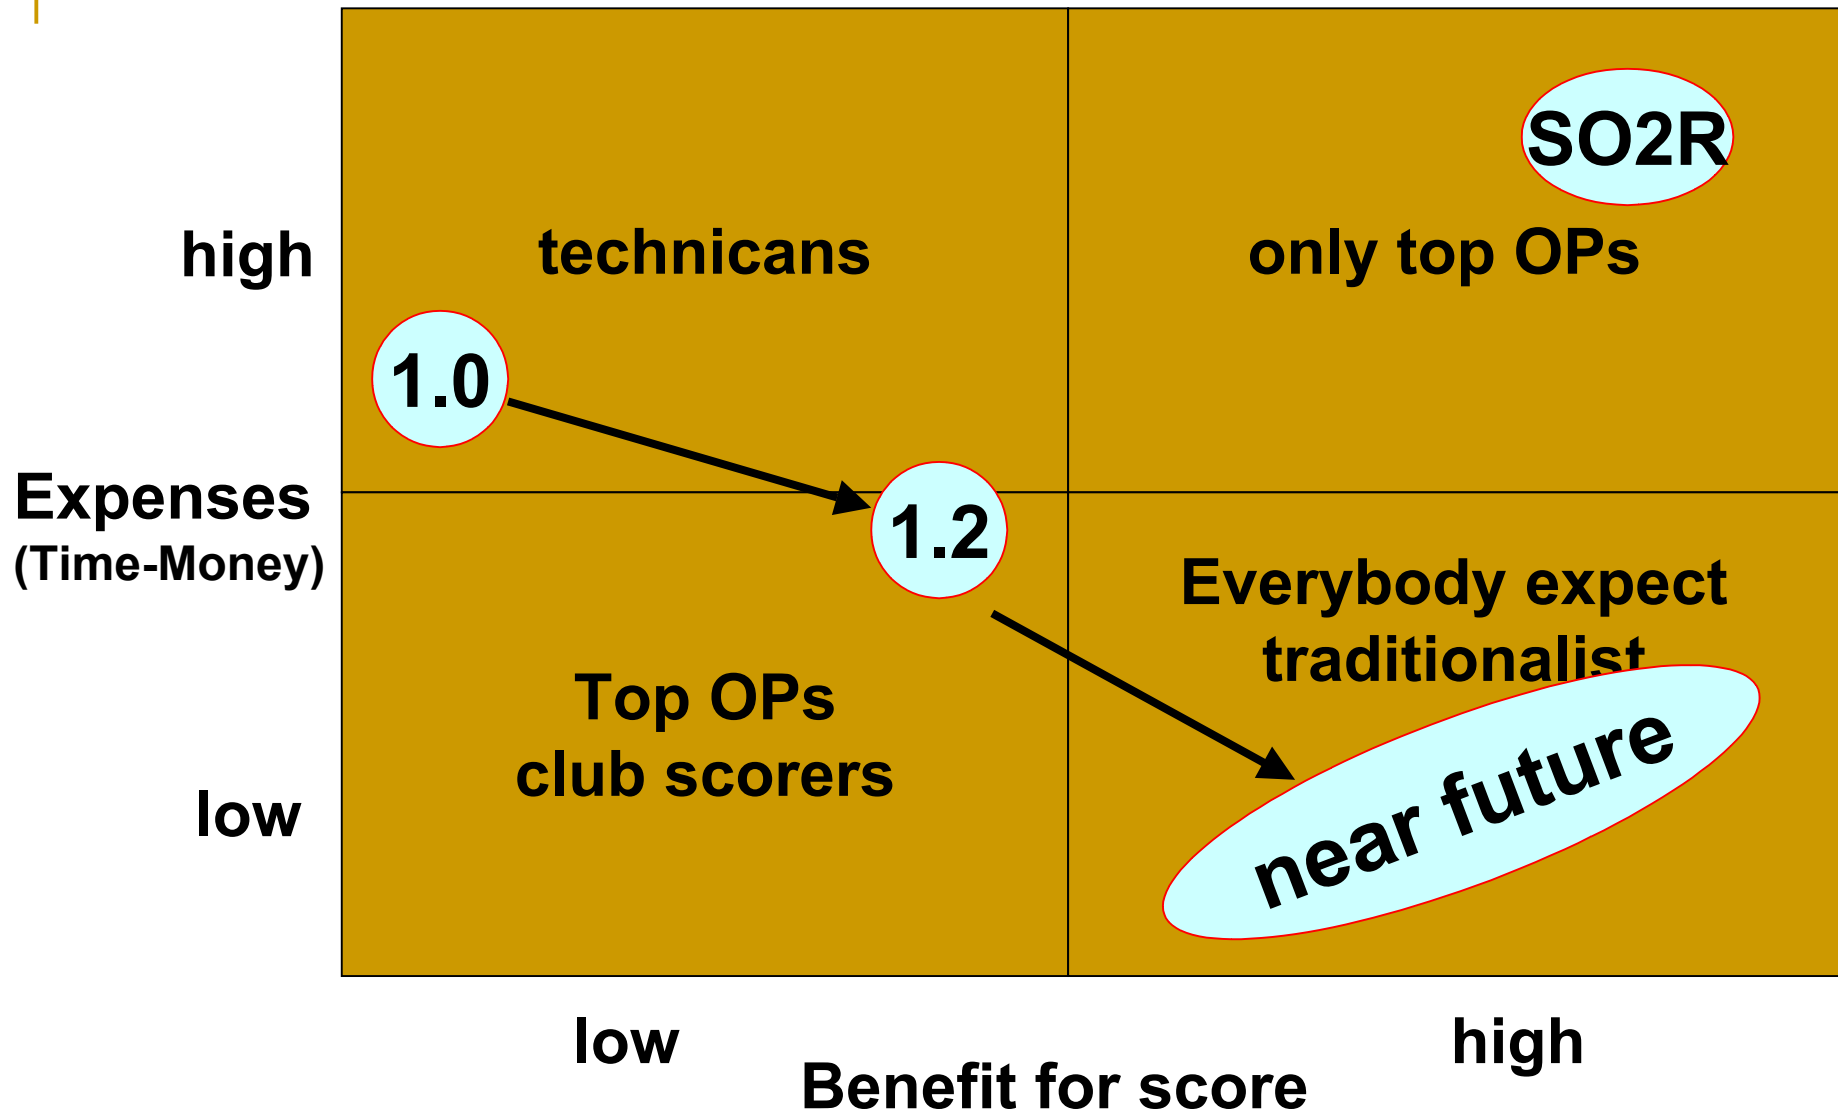

Tech	score impr.	relaxation
CW with memory keyer	5 %	20 %
CW keying with computer	5 %	30 %
Computer logging	5 %	20 %
Packet Cluster	20 %	20 %
Automatic switch Band/Ant.	5 %	20 %
Computer rotated beams	?	?
CW Skimmer	20 %	20 %

5..30 %

Who is in the contest?

What are the goals?

- The top OPs (top skills + top station)
 - Eager to win!
- The normal contester (e.g. DL6MHW)
 - Good score, e.g. for BCC
 - Operation contest style
 - Wins sometimes some category
- DXers
 - Work DX
- Technician
 - Test station and technology

CW Skimmer: contra (less emotional)

- Technology substitutes excellence in operation
- Again technological arms raise (like SO2R)
- More time waste for technology causes less time for contesting
- Next step to an robot operator

rules & categories

- Wide spectrum of opinions
- DARC DXHF
 - No separate assisted Category →
No problem with CW Skimmer
- CQ WPX
 - K5ZD: Call for Ideas
- CQ WW ?
 - What means assisted?
- New Category?
→ Single Op unlimited

**Allow local CW
Skimmer:
Just another box
in the shack**

assisted

Multi OP

strictly No Skimmer

It will be assisted (I think)

- **No ban** because you can not withdraw technology
- **No general use** because
 - ❑ CW Skimmer does something that one operator can not do
 - ❑ Operation patterns similar to assisted
- Fits somehow into **assisted**:
 - ❑ Similar benefit like cluster
 - ❑ Similar Op patterns

Rules & rumours

CQWW Nearing Final Action On Skimmer; Signs Still Point To Assisted Category Ruling

By **Jamie Dupree NS3T** radio-sport.net

Posted June 23, 2008

The head of the CQ WorldWide DX Contest Committee has told radio-sport.net that a final decision on new rules dealing with the controversial CW Skimmer program should be public in July.

"The CQWWCC has not yet decided on a final statement regarding Skimmer," said Bob Cox K3EST, who added that he expected a resolution "in about three weeks."

Conclusion

- Interesting technology – some fun
 - CW Skimmer brings SDR to contesting
 - Easy to test → but not in a serious SO entry
 - VE3NEA develops excellent ideas → open for improvements
-
- CW Skimmer will be used because it is useful
 - “If you outlaw skimmers, then only outlaws will have skimmers”

Science Fiction

- Contest robots (but why?)
- Interaction CW Skimmer \leftrightarrow contest logger
- Reverse beacon projects
 - www.dxwatch.com
 - other aggregations
- Skimmer cluster network
 - Prove local skimmer spots with global spots

TNX and FINALLY

DON'T PANIC

TNX for support, fruitful and sometimes controversial discussions
DG0ZB, DH1TW, DH0GHU, DJ1OJ DJ0ZY, DL2RD, DL3TD, DL6FBL,
DL8WPX, DL8MBS, K1DG, K5ZD, N4ZR ... and many others

What is contesting? Who should win the competition?

- Operation skills... YES!
- Application of technology... YES!
- Much time ...Yes
- Money ... (yes)
- Most testers are restricted
 - Special class for father with two children and tv problems with the neighbour?

TNX for support, fruitful and sometimes controversial discussions

- VE3NEA for his great software programs
- DG0ZB, DH1TW, DH0GHU, DJ1OJ
DJ0ZY, DL2RD, DL3TD, DL6FBL, DL8WPX,
DL8MBS, K1DG, K5ZD, N4ZR ... and many
others

CW Skimmer: Emotions

(petition against CW Skimmer)

- Please help us stop CW Skimmer from our beautiful hobby!!!
- This technology does not advance the art of radio
- I am strongly against such robots trying to take us away from our sport.
- It could destroy the hobby
- we have to stop this now, or it will waste CW contesting as we know it !
- CW Skimmer makes contest to button pressing contest

<http://www.ipetitions.com/petition/skimmer>

NOVA – CW Skimmer
Ham Radio Friedrichshafen 2008

-
- DL8MBS: Skimmer will develop into a widespread valuable tool. But as much as engines for sailboats may be valuable tools, they are not used in sailboat-races. Hopefully this petition brings at least some understanding to what extent contesting is also a skill-competition besides a station building competition.

-
- The evaluation of the technology, as well as the integrity of the adjudication process, is of paramount importance to the Contest Branch. To make sure the results are generated properly, we require that all Single Operator stations using Skimmer make that statement in the Soapbox field in their Cabrillo header. For example, "Skimmer was used." is sufficient. Do not put such a statement in the subject or body of the email log submission - it will not be read. If the log checkers do not know that Skimmer was used, an incorrect conclusion as to entry class (e.g. Single Operator or Multi-Operator) may be reached, or a log could be subject to review by the ARRL Awards Committee, which could result in penalties up to and including disqualification.
 - ***This accommodation of Skimmer technology for the 2008 IARU HF Championship does not imply in any way the permanent acceptance of Skimmer's use in Single-Operator category operation in ARRL Contests.***
The technology will be evaluated and long-term rulings on how it may be used in this contest will be made in the 2009 rules or before.
 - Since there is no Single-Operator Assisted category, anyone using external assistance through packet or the internet should enter as a Multi-Operator entry, and, as in the past, the entry may be re-categorized or disqualified if assistance is not declared.

Some more features

- Support CAT, Radio
 - Bandmap
- I/Q Balancer
- Logging software control skimmer
- Build in call validation

Status

- Similar to DX Cluster (assisted) but
 - ❑ More spots (5...100 Times)
 - ❑ Local spots (good)
 - ❑ Not proved by an intelligent OP (bad)
 - ❑ Easy multipliers spotted, e.g. DK6WL in WPX (good)
 - ❑ Some corrupted spots ... but improving
