Conrats to the winners SF6F (SOP) and YU7PS (MOP) !

DL1SUZ:

Hallo Alex,

hier die Abrechnung für den BCC-MS-Contest 2021.
Es hat wiederum viel Spaß gemacht. Die Aktivität war schon beeindruckend. Durch die Popularität von WSJT-X oder den Derivaten (wegen FT8) sind auch viele neuen Calls aufgetaucht. Leider natürlich auch wieder einige schwarze Schafe, die nicht wissen wie es geht. Habe leider mehrere Stationen in der falschen Periode auf der 144.360 gehabt. Dann ist erstmal alles vorbei. Vor dem Sender das Gehirn einschalten !!!! Leider kann man in WSJT-X den Knopf für die Sendeperiode nicht verriegeln. So kann man auch mal aus Versehen in die falsche Periode kommen, wenn man eine Station anklickt, mit welcher man arbeiten möchte.

Ihr legt ja in Eurer Abschreibung viel Wert auf die CW-QSOs. Mich würde mal interessieren, ob überhaupt CW-QSOs abgerechnet werden. Wer kann denn noch HSCW machen? Ich glaube, dass man das nur noch nach Vereinbarung machen kann(und das darf man nicht). Es ruft da niemand mehr in CW. Der Zug ist meiner Meinung nach schon vor 15-20 Jahren abgefahren. Wer kann den noch HSCW aufnehmen? Das PC-Programm, welches es mal gab, lief nur noch unter Win95 oder Win98 und wird nicht mehr gepflegt. Ich hab sogar vergessen, wie es hieß. Ich hätte noch einen DTR ganz hinten im Schrank. Mittlerweile ist ja FSK441 schon wieder ein alter Hut (unberechtigt, wie ich meine, weil für bestimmte Anwendungen offensichtlich empfindlicher). So langsam könnt ihr Zusatzpunkte für FSK441 geben, hi.

Hello Alex,

here is the statement for the BCC-MS-Contest 2021.
It was great fun again. The activity was already impressive. Due to the popularity of WSJT-X or its derivatives (because of FT8) many new calls have also appeared. Unfortunately of course also some black sheep who don't know how to do it. Have unfortunately had several stations in the wrong period on the 144.360. Then it's all over. Turn on your brain before transmit!!!!
Unfortunately, in WSJT-X you cannot use the button for the broadcast period lock. So you can accidentally get into the wrong period come up when you click on a station you want to work with.
You put a lot of value on the CW QSOs in your write-up. me would wondering whether CW QSOs are billed at all. Who can still do HSCW? I think that's just after can make an agreement (and you are not allowed to).
Nobody calls in CW anymore. In my opinion, the train left 15-20 years ago. who can HSCW still record it? The PC program that used to be there ran only under Win95 or Win98 and is no longer maintained. I have even forgot what it was called.
I still have a DTR in the back of the closet.
In the meantime, FSK441 is old hat again (unjustified, how I mean because obviously more sensitive for certain applications).
Slowly you can give extra points for FSK441, hi.

PA2CHR:

This is it J I spend again a lot of time and worked 55 new stations. A lot of activity on 144.360 in MSK. Unfortunately also a lot of stations who do not know the elementary rules like: use always 2nd period in Central Europe and tx 30 seconds periods. Maybe, if possible, add to the contest rules: call only CQ on 144.360 (CQ 348 PA2CHR JO32) So, no longer running QSO's on .360 only CQ calls.

Thanks and best 73's, Chris, PA2CHR

YL2IV :

Not good in this year! No internet, no antenna rotation, only on 230 degree. I did not see a big maximum. Thanks for the contest and I see you in 2022!

Happy new Year, 73!

Oskar, YL2IV
